

Evidence Journey

Registration **GJ01AB1234** | Pursuit synthetic-module4-qa

Created 2026-09-28T07:00:00+00:00 | Scope Owned demonstration

Records	Supported observations	Candidates	Rejected
0	0	0	0

OBSERVED CAMERA LOCATIONS

No verified-evidence observations for this query.

Schematic geographic positions. Dashed links are inferred, not roads.

Time and inference contract

Source PTS is a per-stream media clock. A timestamp marked approximate is a receive-time diagnostic, not a verified event time. An attested PTS-to-UTC mapping is used only for the matching stream generation. Straight dashed links are possible connections, not observed travel or road routes.

Gap: Synthetic layout fixture only. Counts and coverage are examples, not operational detections.

Observed and reviewed records

No historical sightings matched this query.

Inferred connections

No supported pair of observations to connect.

Watchlist alerts

No watchlist alerts linked to these sightings.

Active Pursuit schedule

Revision 2 | 2026-09-28T07:00:00+00:00 | budget 8.45 fps including 30% headroom | external workers reserved 0.00 fps.
Reason: Synthetic QA revision after feed health change.

demo-east: requested 3.000 fps, worker acknowledged 2.900 fps, current 2.900 fps; Highest ranked healthy camera.

demo-central: requested 2.500 fps, worker acknowledged 2.400 fps, current 2.400 fps; Alternative direction baseline.

demo-west: requested 2.500 fps, worker acknowledged 0.000 fps, current 0.000 fps; Feed became unavailable.

demo-north: requested 0.000 fps, worker acknowledged 0.000 fps, current 0.000 fps; Excluded by measured worker budget.

Coverage Integrity Ledger

Window clock is operational server UTC. 'Not observed in sampled frames' does not prove the target was absent. Planned frames derive from a worker-acknowledged rate; actual analyzed frames determine coverage.

Revision 2 | demo-east | 2026-09-28T07:00:00+00:00 to 2026-09-28T07:00:10+00:00

observed - Supported target read in sampled frames. Planned 30; received 31; analyzed 29; capture/decode exceptions 0; health online.

Revision 2 | demo-central | 2026-09-28T07:00:00+00:00 to 2026-09-28T07:00:10+00:00

not observed in sampled frames - No supported read among sufficient samples. Planned 25; received 27; analyzed 24; capture/decode exceptions 0; health online.

Revision 2 | demo-west | 2026-09-28T07:00:00+00:00 to 2026-09-28T07:00:10+00:00

feed unavailable - Owned replay disconnected. Planned 25; received 0; analyzed 0; capture/decode exceptions 1; health unavailable.

Revision 2 | demo-north | 2026-09-28T07:00:00+00:00 to 2026-09-28T07:00:10+00:00

insufficient coverage - Worker did not acknowledge enough sampling. Planned 0; received 9; analyzed 2; capture/decode exceptions 0; health online.
